Precisions / Works Scenario Movies are organized on five chapters / five apparatuses

- 1° **Here & Tomorrow** / Fiction as Practice / An operative and fictional architecture which tries to re-scenarize the relation with a situation, with an environment (like principle of reality)
- 2° **Here & Now** / Practice as Lifespan (H&N) / A fragile architecture which negotiates with the arrow of time, with the transitory one or what seems the being
- 3° **Elsewhere & Simultaneoulsy** / BioPolitic / Research as Speculation / A speculative architecture which works out devices between robotics, mathematics, neurobiology and biochemistry (have a look on internet on the both exhibition-research “Ive heard about” & “an architecture of moods”
- 4° **mythomaniaS** / Psycho Daily Routine / An anthro-po-technic research on human pathologies and shelters through scenarized case studies.
- 5° **Bachelor Machines** / Process / Disruptive Logic / Haptic signal / (n)certainities & undeterminism / in a narrative ‘realism’ of operative mode.
